COMPANY OVERVIEW

Premier Technical Services Corporation (Premier) is a **Service-Disabled Veteran-Owned Small Business (SDVOSB) and HUBZone-certified** small business that delivers comprehensive, mission-driven Information Technology solutions since 1989. Premier delivers comprehensive, mission-driven solutions across two core disciplines: **Information Management (IM)** and **Information Technology (IT)**. We are committed to Customer Satisfaction with Timely, Accurate and Within-Budget Results.

Our IM services focus on the strategic oversight and optimization of technology.

- Data quality & standardization
- Data governance & stewardship
- Information governance & policy enforcement
- Knowledge capture & sharing frameworks
- Records management & compliance
- Regulatory compliance frameworks
- Requirements gathering & analysis

Our IT services encompass the full spectrum of technical execution.

- Cloud, on-prem & hybrid infrastructure
- Cybersecurity & risk management
- Full-stack application development
- Help desk & service desk support
- Network administration & monitoring
- Solution architecture & system design
- System performance & scalability optimization

PAST PERFORMANCE

Environmental Protection Agency (EPA) / Multi-Site Infrastructure & Systems Engineering Support

Premier delivered comprehensive IT engineering and system administration services supporting EPA operations across multiple locations, including Raleigh, NC; Oak Ridge, TN; and Washington, DC.

- Applied security patches and IAVAs to maintain compliance and security posture
- Conducted system validation and verification for multiple software baselines
- Developed and maintained configuration management documentation
- Installed, configured, secured, and maintained enterprise systems
- Performed capacity planning, performance monitoring, and system optimization
- Provided multi-site system administration and infrastructure support
- Supported virtualization environments ensuring operational continuity

Federal Aviation Administration (FAA) / AFSS Program – Safe Flight Operations

Premier provided nationwide IT support services for the FAA Flight Service Program (AFSS), delivering critical aeronautical and meteorological information systems that directly support safe and efficient flight operations.

- Enabled safe and efficient flight operations across CONUS, Hawaii, and Puerto Rico
- Maintained high availability for mission-critical aviation systems
- Nationwide deployment of IT specialists across multiple FAA sites
- Supported real-time data collection, processing, and dissemination systems

DIFFERENTIATORS

Premier has never lost a contract due to nonperformance or noncompliance!

- 35+ years of federal IT experience
- Accredited and Scalable workforce (on-site, hybrid, remote)
- Compliance and Maintenance focused
- Full lifecycle IT services delivery
- SME-level engineering expertise
